

WHAT WE DO

MODU Project Services draws on many years of knowledge, experience and professionalism to deliver turnkey project solutions to our customers, on time, within specification and on budget.

Our services include:

Project Planning, Control & Management – From initial customer enquiry, MODU Project Services has the expertise to see our client's projects through from planning, build-up, implementation and close-out.

Design Reviews – All our designs are evaluated against the requirements set out by our clients, to verify areas that may require further work before committing to the final design.

EX Surveys & Remedial Work –

MODU Project Services provide a range of EX surveys and remedial work scopes that can be tailored specific to our client's requirements and the depth of inspection needed.

Client Integration Works –

MODU Project Services offer a turnkey solution to major oil & gas providers for the interfacing of production facilities and mobile drilling installations.

Material Procurement– We have built relationships with our material suppliers over decades in the industry to ensure we can provide our clients with fast and reliable material deliveries.

Technical Report Writing – Our reports are designed to convey technical information in a clear and easily accessible format. It is constructed in a way that will allow different readers to access different levels of information, quickly and easily.

Supply of Skilled Teams and Personnel

– MODU Project Services have strict competency assurance program to ensure all our managers, supervisors and contractors have the necessary competence to fulfill our client initiated work scope efficiently and safely.

Construction Management, Installation, Testing and Commissioning

– All our client work scopes are completed to meet the standards outlined by our clients, in order to achieve the applicable statutory and regulatory requirements governed by their authorizing bodies.
