

# MODU Project Services

When it comes to getting our customers drilling rigs out on contract, there is nothing that the team at MODU Project Services cannot achieve. We are continuously improving our processes and systems to deliver operational efficiency and safety, in doing so we are continuously exceeding our customers expectations.

**We have strategically placed ourselves to not only service the drilling industry, but also their customers at every stage of their cycle from reactivation to deactivation and everything in between.**

## SUCCESSFULLY COMPLETED OVER THE LAST 12 MONTHS

- Project managed the **reactivation** of the VALARIS JU-100
- Provided project management to Maersk Deliverer while conducting **5 yearly maintenance**
- Project managed VALARIS JU-72 cantilever extension **modifications**
- Interfaced the VALARIS JU-122 with Weatherford's MPD package, involving a complete fixed **E&I installation**
- Installed various Electrical & Instrumentation cables and new **upgraded** air conditioning units in crane cabins onboard the VALARIS GVI
- Installed data and power supplies on behalf of Premier Oil for their third-party **interface** onboard the VALARIS JU-123

During the completion of these work scopes MODU Project Services has accrued **26280 man hours, accident and incident free.**

## MAERSK GALLANT

Conducted surveys and repairs on the following areas:

- Drag chain cabling
- Relocated the cantilever skidding control system
- Traced and rectified all earth faults on the main 480V distribution system
- Replaced 21 jacking motor gland plates
- Conducted a full survey of the rigs cable transits and rectified findings
